

§ 230.6

36 CFR Ch. II (7–1–05 Edition)

(b) To be eligible to receive cost-share funds under the Program, a landowner shall own not more than a total of 1,000 acres of nonindustrial private forest land, except where the State Forester, with the concurrence of the Regional Forester, determines that significant public benefits would accrue from approval of a landowner owning not more than 5,000 acres. In making a determination of significant public benefits, the State Forester and the Regional Forester shall consider, at a minimum, whether the installation of practices by landowners who own more than 1,000 acres but less than 5,000 acres are necessary to achieve cost-effective resource management objectives without unduly affecting Program participation of other eligible landowners.

(c) To be eligible to receive cost-share funds under the Program, a landowner shall not own less than the minimum contiguous acreage as established by the State Forester. However, in no case shall the minimum contiguous acreage requirement be higher than 25 acres.

(d) To be eligible to receive cost-share funds under the Program, a landowner must agree to manage the following lands under a Landowner Forest Stewardship Plan prepared pursuant to § 230.6 of this subpart:

(1) All of their nonindustrial private forest land with existing tree cover within a contiguous tract; and

(2) Other nonindustrial private forest land within the same contiguous tract which is identified by the landowner and approved by the Service Representative as suitable for growing trees and scheduled for conversion to a Program practice.

(e) To be eligible to receive cost-share funds under the Program, a landowner must agree to maintain Program practices for 10 years, unless otherwise specified by the Chief.

§ 230.6 Landowner forest stewardship plan.

(a) Prior to receiving approval to implement any Program practice identified in § 230.7(a)(2)–(9) of this subpart, eligible landowners shall have an approved landowner forest stewardship plan. The landowner forest stewardship

plan shall be prepared by a Resource Management Professional and approved by a Service Representative and shall identify and describe actions to be taken by the landowner to protect and manage soil, water, aesthetic qualities, recreation, timber, and fish and wildlife resources in a manner which is compatible with the objectives of the landowner.

(b) A landowner forest stewardship plan shall be effective for not less than 10 years, but shall be reviewed at least every five years and may be revised as needed, subject to approval of the Service Representative.

(c) To the extent deemed applicable by the Service Representative, where existing landowner management plans such as conservation plans, Tree Farm management plans, or similar plans meet or can be amended to meet Landowner Forest Stewardship Plan requirements, such plans shall satisfy the requirements of this section.

(d) If a landowner sells or otherwise conveys land covered by a landowner forest stewardship plan, such plan shall remain in effect if agreed to by the new owner. New landowner objectives shall be incorporated through plan revision as needed. Where the new landowner does not agree to adopt the Landowner Forest Stewardship plan, the new landowner cannot obtain approval of new Program practices without preparation and approval of a new Landowner Forest Stewardship Plan.

§ 230.7 Program practices.

(a) Practices for which cost sharing is available under the Stewardship Incentive Program and the reporting codes assigned to each are as follows:

(1) Landowner Forest Stewardship Plan Development (SIP1), which identifies landowner objectives and multiple resource management decisions.

(2) Reforestation and Afforestation (SIP2), which includes establishment or reestablishment of diverse stands of forest trees through natural regeneration, planting, or direct seeding for conservation purposes and sustainable timber production.

(3) Forest and Agroforest Improvement (SIP3), which includes the improvement of forest and agroforest stand productivity, vigor, and health,

Forest Service, USDA

§ 230.9

and the value and quality of wood products.

(4) Windbreak and Hedgerow Establishment, Maintenance and Renovation (SIP4), which includes the establishment, maintenance, and renovation of windbreaks and hedgerows to conserve energy, protect farmsteads, livestock, and crops, and reduce soil erosion.

(5) Soil and Water Protection and Improvement (SIP5), which includes the maintenance or improvement of water quality and soil productivity on forest land.

(6) Riparian and Wetland Protection and Improvement (SIP6), which includes the protection, restoration, and improvement of wetlands and riparian areas to maintain water quality and enhance habitat.

(7) Fisheries Habitat Enhancement (SIP7), which includes the protection and enhancement of habitat for native resident and anadromous fisheries.

(8) Wildlife Habitat Enhancement (SIP8), which includes the establishment and enhancement of permanent habitat for game and nongame wildlife species.

(9) Forest Recreation Enhancement (SIP9), which includes the enhancement of outdoor recreation activities and aesthetics.

(b) In the application and use of pesticides, including biological, chemical, and behavioral substances, practice performance shall meet all label requirements, State and Federal regulations, and local ordinances.

(c) Anyone who carries out practices under this Program shall be responsible for obtaining the authorities, rights, easements, or other approvals necessary to the performance and maintenance of the practices in keeping with applicable laws and regulations.

§ 230.8 Application and approval.

(a) A landowner wishing to participate in the Program shall contact the local office of the State Forester who shall provide information necessary to make application.

(b) The State Forester, or such official as the State Forester may designate, shall make basic eligibility determinations, including whether the applicant meets nonindustrial private

forest land ownership criteria and minimum and maximum acreage criteria in accordance with §230.5 of this subpart, and approve Program practices. The landowner shall be notified of such determination in writing by mail.

(c) The State Forester, or such official as the State Forester may designate, shall approve Program practices based on the following:

(1) For approval of practices described in §230.7(a)(2)–(a)(9) of this subpart, verification that the landowner has an approved landowner forest stewardship plan.

(2) A determination whether the practice is needed and feasible.

(3) A determination that the practice is consistent with funding priorities established by the State Forester.

(d) Applications shall not be approved unless cost-share funds are available. Approval of an application shall constitute an agreement by the United States and the landowner to cost-share approved practices upon acceptable performance.

(e) Upon approval of Program practices, a Service Representative shall prepare a project outline that identifies the needed technical practices, specifications, and approximate time frame(s) for the implementation of the practice(s) to achieve the objectives of the landowner forest stewardship plan. Upon agreement by the landowner and the Service Representative to the requirements set forth in the project outline, the outline shall be attached to and become part of the landowner forest stewardship plan and shall be effective for the duration of the practice. Requirements of a project outline shall constitute the basis for determining acceptable performance upon practice completion.

(f) Upon approval of Program practices, the landowner shall be notified of approved practices in writing. Such notice shall state that the landowner can begin implementing approved practices.

§ 230.9 Payment to landowners.

(a) To be eligible for cost-share payments, a landowner must complete each practice within eighteen months of approval. However, if practice(s) are not completed in eighteen months due
